

Information About Submitting Artwork

Any artwork that is neuro-related is appropriate for submission. Browse the previously submitted work to see the types of subjects that were submitted by others. There is no time limit for submission, but it is best to have the graphic done by the end of the module. After the module ends, Endo and STEP 1 will start to occupy a lot of your time and it will be difficult to complete it.

FORMAT

- The graphic can be digital or hard copy, but digital is preferred. Hard copy graphic will be scanned.
- Digital images should be saved in Photoshop or TIF format if possible; Otherwise save as a jpg.
- Color or black and white graphics are acceptable.
- For hard copy pencil/ink drawings, line drawings 5 x 7 inches work well. Be aware that lightly drawn lines and text often are difficult to reproduce. For larger drawings, visibility can be a problem when they are scaled down for web display.
